CIP [10] lists performance as: Transducing Method Pressures (energies): average maximum WFPK = 4050 bar, PE (test pressure) = 5060 bar, EE (minimum test energy) = 2370 JULES The .22-250 is currently the fastest cartridge in the world, exceeding the 204 roarer, at 4,450 feet per second. [11] is particularly popular in the western states of the USA, where high winds often hinder the effectiveness of other varmint rounds in dog hunting prairie. ^ a b c d "voluntary indotria performance standards for pressure and munition centerfire rifle speed for the use of commercial manufacturers" (pdf). stephen blacksmith, expert in behavior of the Canadian bears, quotes a study of u. ^ "american bullet cartridges", the gun digest, 35th ed, 1981. due to the efficiency of the cartridge in shorter barrels, rougher, savage, brownng, weathery and remington offer it in carbine models, as well as in weapons with regular barrel lengths. ^ "the cartridge of the lowest rifles in America"! shooting times February 1987. matunas, who participated in the development of recharge manuals for lyman, says, "the 7mm-08 remington is an efficient round and competes effectively against the 308 winchester. "[12] jeff cooper was impressed enough by the 7mm-08 to provide unequalled support for use in scout rifles in .308 or 7mm-08" [13] the 7mm-08 with 139-140 grain loads do well against about 150-grain 308 win. ^ "7mm-08--A great little cartridge" shooting times July 2015. handloading the popularity of the cartridge means there is a wide selection of factory loads, so it is an option even for those who do not carry hand. john t. all sizes in millimeters (mm) / imperial (inches). (4.1g) power point 3,500 ft/s (1,100 m/s) 1.741 ft-lbf (2,360 j) Source(s): hodgdon [1] .22-250 remington maximum C.I.P cartridges dimensions. ^ "What about 7mm-08?" shooting times April 1985. oted is reading a free preview pages 1661 to 1677 are not shown in this preview. .saami.org its trajectory is comparable to .270[6] The cartridge serves experienced shooters and hunters well. (2.6g) BT 4.224 ft/s (1,287 m/s) m/s) (2,149Á Á) 50 gr. On April 20, 2022, the United States Army adopted the new Next Generation Squad Weapon, designated as the XM5 which will use a .278 inch bullet in a necked down 7.62ÁÁ51mm NATO (colloquially .308 Winchester) case, the new cartridge is designated as 6.8 ÁÁ 51 Common or alternatively known in the commercial market as the .277 Fury.[31] The bullet size of the 6.8 ÁÁ 51 cartridge is virtually identical to the bullet of the 7mm-08 Remington, the difference in diameter is less than 1/128 of an inch (0.2Á Ámm) or approximately the thickness of two human hairs.[32] In addition as noted, both the 6.8 ÁÁ 51 cartridge and the 7mm-08 Remington share the same parent case of the 7.62x51mm NATO (colloquially .308 Winchester), necked down to accept the respective bullet of each cartridge.[32] The most dramatic departure between these two cartridges concerns a new manufacturing technique used in relation to the 6.8 ÁÁ 51 combat cartridge (designated as the 135 gr (9 g) Hybrid Match), which employs a stainless-steel cartridge head. You're Reading a Free Preview Pages 1357 to 1408 are not shown in this preview. This cartridge is also sometimes known as the .22 Varminter or the .22 Wotkyns Original Swift.[3] Along with the .220 Swift, the .22-250 was one of the high-velocity .22 caliber cartridges that developed a reputation for remote wounding effects known as hydrostatic shock in the late 1930s and early 1940s.[4][5] History The .22-250 started life as a wildcat cartridge developed from the .250-3000 Savage case necked down to take a .224 caliber bullet. Howard Brant of Shooting Industry magazine wrote: "the 7mm-08 is a real sleeper as far as the hunting field is concerned. In 1981 Ken Waters looked at Remington's (then) PSP loads and had this to say about the 140-grain 7mm-08 PSP: "From this we must conclude that it betters the 150-gr. The catch is, in order to send a .30-caliber slug over a trajectory as flat as J I don't know J ro NATO mm15 mm26.7/reitsehniW 803. ####

200 yards and 1,525 FPE to 300. [27] Careful manual load of a bullet of greater BC should restore the gain gain of 270. I'm gonna go 7 suitable for most North American big game make the 7mm-08 a fine choice for all-around hunting. Such loads allow it, for that purpose, to be compared favourably with the 6.5ÅÅ55 SE, 7ÅÅ57mm, 7ÅÅ57mmR, 300 Savage, 303 British, and some .308 Winchester and .270 Winchester loads. Archived from the original on 2010-01-06. He said he had his order in for one of the first heavy-barrel models, expected in June 1963, and added, "I can hardly wait!"[6] Two years later, in 1965, Remington Arms adopted the .22-250, added "Remington" to the name and chambered their Model 700 and 40 XB match rifles for the cartridge along with a line of commercial ammunition, thus establishing its commercial specification.[7] The .22-250 was the first non-Weatherby caliber offered in the unique Weatherby Mark V rifle.
